Q2 2023 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

The Pet Cemetery, also known as "Happy Woodland Pet Cemetery," is located in a wooded area. The property was formerly used by dog breeders in the late 1920's, they buried their first pet on the property in 1933. The owners erected a stone memorial that read, "Our Dear Pets: they lived happy and died beloved". This commenced the establishment of the pet cemetery. It is believed that the last pet burial was in 1978. The Town of Aurora has owned the pet cemetery lands since approximately 2011. In 2017, the Town allocated annual funds towards restoration of the site. The cemetery land is approximately 2,400 square meters (0.24 ha or 0.60 ac). Three sides of the pet cemetery are bordered by a private property and the fourth side is adjacent to other Town owned lands (forested area). The plan is to create a publicly accessible trail through the Town lands which will connect to the pet cemetery.

The property requires a perimeter fence to delineate the boundary and to provide a level of security for the site.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Staff presented report CMS22-008 which provided an update on the project and provided suggestions for a permanent fence. The report also noted that a site survey was to be completed in the spring of 2022 to help confirm property boundaries and identify headstones yet uncovered. This work has been completed. The report from February 2022 estimated approx. \$62,000 for the permanent fence but since then we have determined site topography and defined perimeter which has added to the footprint. Also, in anticipation of approval in Q1 of 2023, by the time the project goes to tender, there is likely an escalation in the cost of materials and labour since the original estimate. Therefore, staff have increased the budget to \$100,000 to assist in covering site details and possible cost escalations. Any unused funds will be returned to source. Although the site is currently closed to the public, the future plan for the site is to make it publicly accessible and to coordinate with a future trail connection which will enable the public to visit and enjoy the pet cemetery safely.

It is important to consider that the permanent fence may not eliminate the risk of damage or theft, but it should provide some level of security. The fence will certainly provide a formal delineation for property

boundaries.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

A permanent fence will provide property boundary and delineation from the adjacent private property. It will also provide a level of security for the site and create a destination for public to enjoy in the future. The pet cemetery has a significant value to the Town, and it is important to do what we can to protect and preserve the historic site.

### Please provide an explanation of what the outcomes would be if the project was not approved.

Without a permanent fence, the site remains at risk of deterioration, damage, and theft. Also, without a fence, future promotion of a public destination may be limited as the visitors to the site may meander onto the private property without knowing the boundary of the cemetery.

### Explain the climate impacts of this project.

Negligible increases in greenhouse gas emissions may occur due to an increased use of vehicles to construct the fence.

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Audio-visual equipment (speakers, monitor, headset) to support the ability to offer virtual and in person fitness classes. Virtual classes were started during COVIDand customer feedback indicates clients would like to continue receiving that service. This equipment provides the opportunity to offer virtual and in person at the same time, which will increase participation and create efficiencies.

## Provide the reasons the project should be approved and what will be the impact of the project to service levels.

This equipment will allow the Town to offer synchronous virtual and in person fitness classes. Customer feedback indicates clients will utilize this service.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Equipment will provide options as to how people participate in fitness classes and expand reach in the community.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

Program delivery options will be limited thus potentially excluding participants who don't want to do in person classes.

#### Explain the climate impacts of this project.

There are no climate impacts as a result of this project.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Snoezelen room/equipment to provide a multi sensory environment for participants. This equipment would provide staff a way to manage behaviours more effectively in recreation programs as multi sensory environments/equipment assist individuals to self regulate. A sensory room will provide individuals with special needs a therapeutic space in Town recreation facilities that provide personalized sensory inputs. This will help individuals calm and focus themselves more effectively so they can be better prepared to interact with others in Town programs ie participants, staff and volunteers.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Snoezelen equipment provides a relaxed atmosphere for participants that may have sensory and other challenges. The space typically provides light effects, tactile experiences, vibrations, gentle movements etc. These rooms/equipment are particularly beneficial for those with challenging behaviours, occupational therapy, learning disabilities, mental health autism, brain injuries, older adults and others.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

This purchase will enable the Town to meet it's goals around inclusion as well as expand Adapted programming through the Town's Inclusion Services division and engage individuals/organizations in the community that have never had access to these types of tools.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

If project not approved will impact Town's ability to provide Inclusive/Accessible environment for participants of all abilities. Risk management implications as well due to increased behaviours observed in Town programs. Could result in Town needing to deny access to recreation services for individuals if we can not effectively accommodate diverse needs of community. Some behaviours are outside scope of staff training. More sensory equipment will provide staff the tools they need to better support individuals with special needs.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q1 2023 - Q2 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

A water refill station is a portable water station where people who are attending large events and activities can refill their water bottles to stay hydrated at outdoor events which sometimes take place on very warm days. Health professionals are always advocated for hydration on warm days.

This purchase will also cut down on the need to sell bottled water at events and contribute to the elimination of one time use plastics.

The unit is towable and can hold up to 300 gallons of water. It has several fountains and spigots for people to easily refill their bottles. It is easy to clean and sanitize and can be filled with a municipal water source.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

This project will contribute to the elimination of one time use plastics by reducing the need to sell bottled water at events. It will also encourage people to stay hydrated and healthy while out at events. People attending events will appreciate not having to purchase water and having somewhere to refill their own bottles.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Reduce the need to sell bottled water at events, thus reducing reliance on one time use plastics and contribute to health and safety of people attending events.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

Bottled water would have to continue to be sold at events and on really hot days there is always a risk of health incidences involving over heating.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q4 2022 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

To allow for the purchase of a new bylaw hybrid vehicle which will allow Officers in Bylaw Services to support new mobile business licensing regulations. An additional vehicle will ensure appropriate responses for violations in taxi cabs, tow trucks, personal transportation companies, and short term rentals.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Approval of this project would ensure that Bylaw Services continues to meet the needs and expectations of a growing community. The project will see an increased presence of existing staff members in Town who will have the ability to respond to a wide range of resident concerns and proactive initiatives.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

As part of this capital request, Bylaw Services would request a gas/electric hybrid vehicle to support the Town's Green Fleet Action Plan and reduce our corporate carbon footprint. It is estimated this vehicle will save the town between \$1,500-3,000 per year in fuel costs in comparison to existing non gas/electric hybrid vehicles in our fleet.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

Increased use of existing vehicles will result in them reaching their end of life sooner,increased costs of maintenance on existing vehicles, increased use of fleet services resources, and inability to appropriately respond to and investigate mobile business licensing concerns.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q3 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Purchase of a new material stacker for use within the Joint Operation Centre for stacking various materials such as salt, aggregates, soils, street sweeping and leaves.

#### Key goals include:

maximizing space within the Joint Operations Centre

reducing Health and Safety risk from current practices

increasing productivity

reducing labour resources

taking advantage of cost savings by purchasing in bulk

reducing wear and tear on equipment.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Purchase of this equipment, if approved, will result in a significant improvement over the current method of ordering stock piling materials at the Joint Operation Centre.

#### Winter Deicing Material:

Staff are currently limited to the amount of winter deicing material they are able to order at one time due to limitations on material storage areas within the salt dome. Current practices involve 2-3 staff with various pieces of equipment including loaders and backhoes building ramps to attempt to pile material as high a possible to maximize storage space and material stockpile/reserves.

#### Street sweepings & leaves:

Current storage areas limit the size of street sweeping and debris piles requiring more frequent disposal and material testing resulting in higher costs.

### **Capital Projects**

| Project    | 34565 Conveyor Material Stacker (New) |      |      |  |  |  |  |  |
|------------|---------------------------------------|------|------|--|--|--|--|--|
| Department | Operational Services                  |      |      |  |  |  |  |  |
| Version    | Final Approved Budget                 | Year | 2023 |  |  |  |  |  |

### Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Project Benefits include:

Increased production and reduced cost per ton. All material can be ordered at the beginning of the winter season resulting in an early fill rate savings and reducing the risk of running the stock pile low during prolonged winter events.

Along with the environmental benefits, stock pile conveyors can contribute significantly towards the improvement of health and safety issues such as reduced noise, dust and emissions levels

Fuel consumption reduction resulting from less equipment and time

### Please provide an explanation of what the outcomes would be if the project was not approved.

If not approved, ordering and stockpiling of material would continue using existing methods. Alternatively, this task could be supplemented with external contracted services. In addition, staff have already explored renting this piece of equipment which is not feasible due to the cost of float services, limited suppliers offering rentals, and minimum charges for rental periods.

### Explain the climate impacts of this project.

Purchasing this material stacker does not impact greenhouse gas emissions or impact climate change.

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q3 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

To allow for the purchase of a new Roads hybrid vehicle which will allow the Roads Technician to support the Roads Supervisor. The Roads Technician will provide technical skills and data collection related to roads asset infrastructure and contract administration.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Approval of this project would ensure that Roads Operations continues to meet the needs and expectations of a growing community and the Minimum Maintenance Standards Reg. 239/02. The project will allow the Roads Technician the ability to respond to a wide range of resident concerns and roads & traffic initiatives.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

As part of this capital request, Roads Operations would request a gas/electric hybrid vehicle to support the Town's green fleet strategy and reduce our corporate carbon footprint. It is estimated this vehicle will save the town between \$1,500-3,000 per year in fuel costs in comparison to existing non gas/electric hybrid vehicles in our fleet.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

Increased use of existing vehicles will result in them reaching their end of life sooner,increased costs of maintenance on existing vehicles, increased use of fleet services resources, and inability to appropriately respond to and investigate resident concerns or provide contract administration.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q1 2023 - Q3 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Purchase of 1/2 ton pick up truck for Building Operator servicing the JOC and other facilities.

As a result of COVID-19, the automotive landscape, like many other industries was significantly impacted. Due to chip shortages and global economical changes, manufacturers cannot supply the vehicles that dealerships ordered in 2021 and 2022. This vehicle was approved in 2021, tendered and awarded with a delivery date in 2022 of a model year of 2022. However, Ford Canada canceled the order in the summer of 2022 with the dealership indicating they would no longer be manufacturing 2022 models and the dealer would need to reorder a 2023 model which included a revised price. Dealership has confirmed the requirement of an additional \$19,000 in a quote and will honour that price pending Council approval for the increase to funding.

The project will require a funding increase to move forward. The original budget amount was set in 2020 at \$45,000 and due to the described circumstances there is a requirement to increase the funding by \$19,000 to reflect our current state in 2023.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

As part of the realignment of existing Facility Operations team, a position was reassigned from the community centre operations group to the Joint Operations Centre. The positions home base will be the Joint Operations Centre, but will be required to travel to other sites. A service vehicle is required to transport tools, equipment and supplies between sites. The vehicle will also be utilized to support other areas within the Community Services Department such as Recreation and Special Events

| Version    | Final Approved Budget            | Year  | 2023 |  |

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Required service vehicle to transport tools, equipment and supplies between sites. Aligns with asset management strategies, maintaining infrastructure and support of ongoing Town programs and initiatives

### Please provide an explanation of what the outcomes would be if the project was not approved.

Staff would need to use personal vehicle and would incur mileage charges, as well as wear and tear/damage to personal vehicle. Personal vehicle have limited capacity to transport many of the required items.

Q1 2022 - Q3 2022

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

A service vehicle is required for the Aurora Town Square Complex. This includes the Cultural Centre, Library Square, Victoria Hall and the Armoury.

As a result of COVID-19, the automotive landscape, like many other industries was significantly impacted. Due to chip shortages and global economical changes, manufacturers cannot supply the vehicles that dealerships ordered in 2021 and 2022. This vehicle was approved in 2022, tendered and awarded with a delivery date in 2022 of a model year of 2022. However, Ford Canada canceled the order in the fall of 2022 with the dealership, indicating they would no longer be manufacturing 2022 models and the dealer would need to reorder a 2023 model which included a revised price. Dealership has confirmed the requirement of an additional \$7,000 in a quote and will honour that price pending Council approval for the increase to funding.

The project will require a funding increase to move forward. The original budget amount was set in 2021 at \$55,000 and due to the described circumstances there is a requirement to increase the funding by \$7,000 to reflect our current state in 2023.

## Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Staff supporting the above facilities are required to transport tools, equipment and supplies required for maintenance as well as furniture, fixtures and equipment to support the various programs being delivered throughout the facilities.

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

To continue the Aurora Community Arboretum partnership project. In 2021, the ACA projects will include works not completed due to Covid 19:

plant material for 2023 volunteer community planting day, wetland waterscape establishment, trail system conversion to granular from turf, construction of a lookout/gazebo structure.

In addition, specimen tree procurement, external maintenance and enhancement contract with Green-Lef, continued establishment of meadowlands, continued enhancement of Field of Gold, equipment and tools.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

The Aurora Community Arboretum (ACA) is seeking to continue their partnership with the Town of Aurora through further tree planting and enhancements and ongoing maintenance of the tree planting areas. The partnership began in 2007 with the understanding that the Town would consider approving \$1.0M in funding over ten years. This partnership allowed staff to enhance the Community arboretum under the Adopt a Park program. The Arboretum Agreement was renewed for another 10 yrs (2018-2028) in January 2018.

| Version    | Final Approved Budget       | Year | 2023 |  |

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

To provide a high quality public attraction/destination feature and increase public participation and volunteering within the community.

LINK TO STRATEGIC PLAN: Supporting environmental stewardship and sustainability - Promoting and advancing green initiatives and continuing to support and enhance community planting programs in appropriate locations.

### Please provide an explanation of what the outcomes would be if the project was not approved.

Management and maintenance of existing Arboretum assets would become responsibility of parks, increasing staff requirements/operational funding to manage lands.

### Explain the climate impacts of this project.

Increase to the urban canopy cover may not increasewhich offsets carbon footprint.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

To inventory the street trees in the new development lands on the 2C lands. It is important to update the current tree inventory to include these new residential areas in Town so we have a complete record. This helps us understand the quantity of trees, diversification of species and locations which details this large asset and assists in maintenance planning. The Town initiated the street tree inventory in the early 2000's and all of the Town has been completed to date.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Inventory supports the Municipal Forestry Policy and the Parks Maintenance Standards, assisting in projecting/managing block pruning and budgeting works. Example of where the inventory has been vital is the management of the EAB treatment program. It has allowed staff to identify the number of trees/diameter to enable budget forecast for treatments and procurement document information, essential to allow Council to make informed decisions. Inventory shared with the GIS department, creating a layer of street trees in iCity that assists forestry/administration staff identifying ownership of trees,defining property lines and tree locations.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

The project will create efficiencies in customer service, planning of work and maintenance schedules. It will also assist in creating accurate forecasts in budgets and reporting of assets. In addition, it will help staff deal with work orders and customers efficiently while improving response time.

### **Capital Projects**

| Project    | 73355 Tree Inventory (2023) |      |      |  |
|------------|-----------------------------|------|------|--|
| Department | Operational Services        |      |      |  |
| Version    | Final Approved Budget       | Year | 2023 |  |

### Please provide an explanation of what the outcomes would be if the project was not approved.

Incomplete registry of assets.

Loss of data essential to operational staff work orders/service delivery.

### Explain the climate impacts of this project.

Accurate inventory tracking allows for a full picture of the urban forest and make up of species which can illustrate where there is opportunity for growth/gaps to expand the canopy cover to mitigate climate impacts.

# Provide a brief overview of the project and include the key goals, objectives and performance measures.

Traffic calming is associated with physical features such as: speed humps, speed cushions and chicanes. They are installed on a road to reduce the speeds at which vehicles travel, to discourage through traffic, to improve traffic safety and to improve comfort levels for all traffic users.

The following locations are included in the traffic study for traffic calming implementation.

- 1. Conover Ave (between River Ridge Blvd and Borealis Ave).
- 2. Conover Ave (between Martell Gate and River Ridge Blvd).
- 3. Kennedy St W (between Bathurst St and McGee Cres).
- 4. Aurora Heights Dr (between Bathurst St and Delayne Dr west leg); and,
- 5. Allenvale Dr (between Carlyle Cres (north leg) and Covent Cres.

The above five (5) locations will be subject to meeting all required warrants before traffic calming measures are installed.

A report to Council will be presented by the end of Q1 2023 with recommendations and estimated costs of implementation for each location.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

#### LINK TO STRATEGIC PLAN

Strategic Plan Goal of Supporting an Exceptional Quality of Life for All

Objective 1: Improve transportation, mobility and connectivity - Examine traffic patterns and identify potential solutions to improve movement and safety for motorists and pedestrians.

Traffic calming solutions should be looked at as a community-wide strategy, as opposed to an on-street-bystreet basis, to ensure that volume and speed concerns are not transferred to adjacent streets. The Town's Traffic Calming Policy identifies the process for the implementation of traffic calming measures

2023 Version Final Approved Budget Year

### Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Traffic calming is intended to:

- improve the quality of life for residents on traffic calmed streets,
- achieve slower speeds for motor vehicles and
- increase the safety for all street users.

### Please provide an explanation of what the outcomes would be if the project was not approved.

There might be an impact on road safety for all street users if the project is not approved.

Q1 2023 - Q4 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

The project involves the installation of traffic signals at the intersection of Wellington Street East and Kaleia Ave/Elyse Crt.

Regional staff has monitored the intersection since 2020 given the ongoing development on the south side of Wellington Street East and the general growth in the area. However the most recent analysis conducted is consistent with the previous study which concluded that the intersection of Wellington Street East and Kaleia Avenue/Elyse Court does not satisfy the technical criteria of the Traffic and Pedestrians Signal Policy approved by the Regional Council. In this case the Regional Council has the authority to approve traffic signals that do not satisfy the policy criteria, if the local municipality requests it and pays for the total cost (design, construction and maintenance) of traffic signal.

The Region will install the traffic signals, the Town will pay to the Region the costs estimated at \$250,000 for the design and installation plus a one-time maintenance fee of \$78,000 covering 10 years of maintenance to a total of \$328,000. The maintenance fee covers annual mandatory inspections, maintenance, and electricity costs.

The funding requests includes the estimated cost of the project which is \$328,000 plus 10% contingency (\$32,800) to a total of \$360,800.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

At the May 24, 2022 Council meeting, Town of Aurora Council approved a motion to request the Regional Council to approve, at the cost of the local municipality, the installation of a traffic signal at the intersection of Wellington Street East and Kaleia Avenue/Elyse Court.

| Version    | Final Approved Budget   | Year | 2023 |  |  |  |  |  |

The total cost of the traffic signal installation is \$328,000 including: design, tender, construction and the estimated maintenance fee for the next 10 years of operation which covers annual mandatory inspections, maintenance and electricity costs. The Region will deliver the design, tender and the installation of the traffic signal and any civil work to meet AODA requirements and paving markings and will charge back the Town.

LINK TO STRATEGIC PLAN: Supporting an exceptional quality of life for all - Objective 2: invest in sustainable infrastructure, maintain and expand infrastructure to support forecasted population growth through technology, waste management, roads, emergency services and accessibility.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

This project represents an investment in sustainable infrastructure and an improvement in safety and accessibility for all members of our community.

### Please provide an explanation of what the outcomes would be if the project was not approved.

Not approving this project will have an impact on safety, mobility and connectivity.

### Explain the climate impacts of this project.

There are no climate impacts as a result of this project.

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2023 - Q2 2024. 2023 Budget Authority conditionally approved. Staff to submit report to Council.

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

The Town and the Region will collaborate to implement the train whistle cessation program at St. John's Sideroad at-grade crossing on Barrie GO Line. According to York Region Policy No. 1146244, Anti-Whistling Warrant Criteria, the Region will consider implementing an anti-whistle program at St. John's Sideroad Pedestrian crossing if the following key actions are completed at the cost of the local municipality:

- a safety audit is completed by a specialized safety consultant;
- the safety audit is approved by Transport Canada;
- an education program is developed for the affected area;
- the detailed design of the safety measures to be implemented is undertaken;
- the peer review of the detailed design is undertaken by a specialized consultant.

Once anti-whistling at St. John's Sideroad grade crossing is endorsed by Regional Council, the Region will be responsible for the cost of construction estimated at \$1,000,000. Construction might include:flashers, gates for the regional road crossing, pedestrian gates and/or maze barriers, AODA improvements if required.

This funding request cover the cost of the safety audit with Transport Canada, design and peer review for the safety measure needed to be implemented for the anti-whistling program at St. John's at-grade crossing.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

The funding request cover the cost of the safety audit with Transport Canada, design and peer review of the safety measures that have to be implemented before the Region can enact a 24 hour anti-whistling program at the St. John's Sideroad level crossing on the Barrie GO Line.

#### **Capital Projects**

Project Department 34570 Train Whistle Cessation at St. John's Sdrd Grade Crossing (Conditionally Approved

Planning & Development Services

Version Final Approved Budget

**Year** 2023

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

As noted by Transport Canada, train whistling is an important way to keep drivers, cyclists and pedestrians safe. The Canadian Rail Operating Rules require all trains to whistle whenever they approach a public at grade crossing. However, in the recognition of the quality-of-life issues that residents face when living in close proximity to a railway, the Town and the Region will collaborate to deliver an anti-whistling program for this grade crossing.

### Please provide an explanation of what the outcomes would be if the project was not approved.

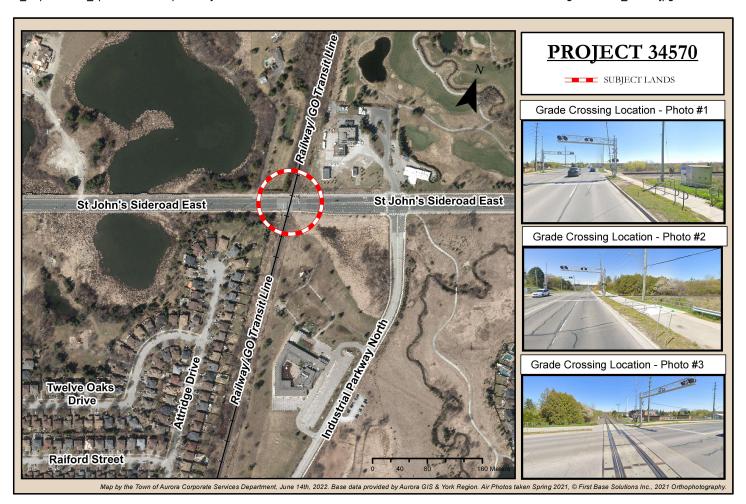

If the project is not approved the safety audit of the St. John's grade crossing will not be delivered together with the detailed design and peer review for the above-mentioned design. As such York Region will not implement the anti-whistle program for this crossing.

### Explain the climate impacts of this project.

There are no climate change impacts related to this project.

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2022 - Q2 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Implement a system for issuing online plumbing permits and road occupancy permits and taking payments in order to:

- 1. Create efficiencies with self-serve functionality for residents to apply for and pay for permits.
- 2. Improve customer service experience for all applicants.
- 3. Reduce the time required to issue a permit.
- 4. Reduce the amount of paper and dependencies on paper.
- 5. Eliminate the duplication of tasks (e.g. road occupancy and building permits sometimes need to be done together one stop shopping for resident).

## Provide the reasons the project should be approved and what will be the impact of the project to service levels.

There is an approved budget of \$25,000 for this project. However, based on the quote received from the vendor for the project with similar scope using the same application, it is highly unlikely that the current approved budget will be sufficient. An increase of \$15,000 to the current approved budget will allow TOA to go into the market for a competitive bid.

Approximately 600 to 800 road occupancy permits are issued per year. External applicants are required to complete an application and provide supporting documents that include site drawings, traffic control plans, certificates of insurance and WSIB documents. Payment is received in the form of cheque or credit card (over the phone). Documents are dropped off at the JOC or emailed. Once the pre-work application, supporting documents and payments are received and processed, the TOA Roads Crew proceed with pre, post and final inspection activities. Information from the inspections are detailed on a form. These multiple inspections are tracked manually via Excel and it is challenging. Challenges include the volume of permits and the various stages of the permit, difficulties determining the due date for each permit. The existing process of using Excel isn't efficient. It is difficult to track activities and hampers the level of customer service the Roads Division can provide.

### **Capital Projects**

| Project    | 14101 Permit Occupancy Applicat | ion  |      |  |
|------------|---------------------------------|------|------|--|
| Department | Financial Services              |      |      |  |
| Version    | Final Approved Budget           | Year | 2023 |  |

Link to Strategic Plan: Objective 2: Invest in sustainable infrastructure – maintain and expand infrastructure to support forecasted population growth through technology. Objective 6: Promoting service accountability, excellence and innovation – Using technology for better decision making, cost savings resulting from greater efficiencies, improved communication and enhanced service levels across the organization.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

A new Road Occupancy Permitting System will bring efficiency and cost savings to the existing process. Improve current level of service and customer satisfaction. Increase staff productivity. Quite often a road occupancy permit and a building permit need to be done together. This project will provide one stop shopping for our residents.

### Please provide an explanation of what the outcomes would be if the project was not approved.

The Roads Division would continue to use Excel with limited capabilities to track road occupancy permits. Continued disconnection with road permit process and other applications such as CityView. Information may not be properly distributed amongst the different departments and divisions. Roads Staff may not have the proper data/information to make better decisions while out in the field. External applicants will still be required to complete a manual application along with long drawn out manually processes with no self-service online functionality. Continued dependencies on paper.

### Explain the climate impacts of this project.

The application will allow the residents to receive services from the comfort of their homes without having to drive to the Town Hall and thus makes a small contribution towards reduction of greenhouse gas emission.

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Q2 2022 - Q2 2023

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

Effective January 1st, 2021, the Town of Aurora will have a three bag garbage limit for residents. This project would be the creation of a web portal designed for residents, where you can go to the portal and purchase tags online if they are going to exceed the three garbage bag limit. The portal would be setup with an online payment system. Once the tags have been purchased we have the option of mailing out the tags to the resident or use a program that would allow you to download tags that can be printed and attached to the garbage bag. This would eliminate the need for residents to go to the Joint Operations Centre or the Aurora Town Hall to purchase garbage tags.

# Provide the reasons the project should be approved and what will be the impact of the project to service levels.

There is an approved budget of \$25,000 for this project. However, based on the quote received from the vendor for the project with similar scope using the same application, it is highly unlikely that the current approved budget will be sufficient. An increase of \$15,000 to the current approved budget will allow TOA to go into the market for a competitive bid.

This project links to the Town's Strategic Plan: Objective 2: Invest in sustainable infrastructure – maintain and expand infrastructure to support forecasted population growth through technology. Objective 6: Promoting service accountability, excellence and innovation – Using technology for better decision making, cost savings resulting from greater efficiencies, improved communication and enhanced service levels across the organization. This portal will provide an ongoing easy way for residents to order and pay for blue boxes and green bins. There will be a direct link to GFL, who will deliver the items to the resident's homes.

### **Capital Projects**

| Project    | 14102 Garbage Tag Portal |      |      |  |
|------------|--------------------------|------|------|--|
| Department | Financial Services       |      |      |  |
| Version    | Final Approved Budget    | Year | 2023 |  |

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Residents will no longer have to go to the Joint Operations Centre or Town Hall to purchase garbage tags. They can purchase garbage tags 24/7 through our Garbage Tag Web Portal. This will provide greater business efficiencies and an improved customer service experience for our residents. It will also provide additional relief for Customer Service Agents dealing with the increased phone calls/emails and aid in tracking customer inquiries and complaints.

### Please provide an explanation of what the outcomes would be if the project was not approved.

Residents will continue to go to Joint Operations Centre or Town Hall to purchase garbage tags. We would continue to use traditional methods of communicating with residents via phone and email. There would be no 24/7 online solution public portal for residents to utilize.

### Explain the climate impacts of this project.

The application will allow the residents to receive services from the comfort of their homes without having to drive to the Town Hall and thus makes a small contribution towards reduction of greenhouse gas emission.

### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Ongoing. 2022 Budget Authority conditionally approved. Staff to submit report to Council.

# Provide a brief overview of the project and include the key goals, objectives and performance measures.

Design and construction of a new park in the Shining Hill Development (once approved) in partnership with St.Anne's School.

Park and school properties border one another allowing for easy flow and partnering opportunities. Park to include a multi use artificial turf, playground, tennis, basketball washroom and small 20 vehicle parking lot. Additional parking and bleacher seating will be accommodated on St. Anne's School lands.

Retention of design consultant in 2022 to provide detailed design, tender documents and contract administration, followed by construction of park in 2023.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

Partnership will be similar to St.Max Artificial Turf field which has been very successful model. Town would have booking rights to the turf in the evenings/weekends and summer months, which are our primary demand time slots for sports users. The addition of an artificial field would assist in offsetting the loss of magna land fields in 2025 and provide field use opportunities. Artificial surfaces also have little to no down time due to rain and extend playing season by approximately 3 months, providing booking opportunities and increased revenue. In addition, the other park amenities will provide area residents with recreational opportunities in their neighborhood.

The park will have impact on operational staff levels and budget as it will be an increase in service with the additional amenities and parkland to maintain. The costs will be identified in 2024 operating budget, The artificial turf requires less maintenance than a natural turf field however washroom, grass and courts will increase the service demand.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

Ongoing strong community partnership with St.Andrew/St.Annes

Premier sorts field with top of the line turf

Support the health/wellness and active lifestyle of residents

### Please provide an explanation of what the outcomes would be if the project was not approved.

Loss of recreational opportunities for residents that promote health and wellness in the community Residents would need to cross St. Johns, cross into Newmarket or travel by vehicle to access parks with similar features

#### TARGET START DATE AND END DATE: Use format Q4 2017 - Q1 2018

Ongoing. 2022 Budget Authority conditionally approved. Staff to submit report to Council.

### Provide a brief overview of the project and include the key goals, objectives and performance measures.

This project will provide Wi-Fi hotspots for residents in outdoor Town parks. Town Park and Library Square will be the first two areas to receive this technology. When residents are in these areas, they will be able to attach their smart phones or other mobile devices to these hotspots and easily access Town services. This project aligns with the Corporate Technology Strategic Plan in that it is providing residents with direct access to Town services and general internet access.

This budget will provide outdoor Wi-Fi for Town Park and Stewart Burnett Park. Other public spaces will be included in future budget requests.

### Provide the reasons the project should be approved and what will be the impact of the project to service levels.

This is a benefit to both Town employees or residents who happen to be in an outdoor area where this technology is deployed. The Mayor would like the ability to provide Wi-Fi services in some outdoor locations.

# Explain the benefits of the project which could include Citizen/Client, compliance, financial, internal, learning & growth or utility benefits.

All residents will receive the benefit of attaching to this Town provided Wi-Fi when they are in an outdoor area with this technology.

#### Please provide an explanation of what the outcomes would be if the project was not approved.

If not approved, residents will not get the benefit and convenience of direct access to Town services and general internet access while in outdoor parks.
