Department: Corporate Services Division: HR Request: Human Resources Specialist/Analyst

Description/Impact:

This position would be responsible for overall HR program support. This role would support HR programs such as health and wellness, training and delivery (including the job hazard analysis project and training matrix), policy development and review, and process mapping. This position will enhance our existing service levels within the organization, proving for a well trained, engaged and safe employee base to perform the required work in our growing community.

- The Occupational Health & Safety Act continues to evolve, and additional responsibilities are being placed upon the employer to ensure that employees are safe in the workplace. Recently, changes related to harassment and violence in the workplace, as well as mental health require the Town to review and update their practices and programs to ensure we continue to meet statutory requirements, as well as meet organizational goals with respect to employee engagement and financial accountability.
- Training and Development has been identified as a Corporate mandate for 2019 and this position will provide the manpower to create a robust, defendable training plan. Without a comprehensive training matrix, corporate costs are not measureable or predictable. This will ensure that health and safety requirements are achieved by role, as well as define a learning path by position for development and succession planning purposes. This also results in increased engagement and satisfaction amongst employees. A robust staff training plan will benefit all levels of the organization ensuring staff are trained and have a development plan that will assist us in succession planning efforts as well as close potential gaps in staffing requirements.
- Policy Development has been also deemed as a corporate priority as Employment laws have been changing quicker than we have seen in employment law history. In order to remain legally compliant and operating in a low risk while agile environment, a fulsome review and update of all our HR policies are required. As a specialized department this type of review must be done by a HR professional in order to establish legal compliance both through legislated and common-law practices.

Department: Corporate Services Division: IT

Request: IT Project Manager

Description/Impact:

This position will add a resource to the IT Project Services team to plan, lead, and effectively manage all Business related IT projects and IT driven projects. The IT Project Manager would be responsible to use the standard corporate project management techniques and processes for all IT related projects. This position will be responsible for the detailed planning, project definition, risk assessment, milestone monitoring, financial tracking, reporting, and most importantly, the effective use of resources to deliver projects on time and on budget. In addition to the project focused tasks, this position also work collaboratively with other project resources within the corporation, to ensure the Town of Aurora project management processes are continually improving.

Many of the Town's current and future projects involve a significant IT component. To help ensure the success of the projects, it is important to have the necessary resources in place to plan and deliver the projects effectively. In addition, the pending IT Strategic Plan update will support the need to augment resources in this area to provide future success for project delivery.

| Notes: | The specifics of this position may change based on the outcomes of the IT Strategic Plan. |

New Staffing
Year: 2019

Category: Full-time

Department: Financial Services Division: Procurement Services

Request: Procurement Consultant

Description/Impact:

As the Town continues to grow, so does the number of contracts that must be tendered, as well as the complexity of those contracts has increased. Procurement Services Division is a critial player in the establishment of these contracts, ensuring the Town's compliance with its own procurement by-law as well as applicable trade treaties. Also, the Town's procurement requirements has evolved and PSD is required to provide further procurement support and advice to our clients. In May of 2018 the Procurement By-law was updated to provide a decentralized procurement approach for purchases under \$25K and added a high value procurement stream (purchases over \$25K). PSD is the lead for all procurements over \$25K. The current structure of the Procurement Services Division (PSD) includes four (4) FTE i.e. Procurement Manager and three (3) Procurement Consultant (PC)s. An analysis of the work volumes and complexity required indicates that the division would be strengthened with an additional resource to provide additional procurement support and advisory services to our Clients.

The review of the workload suggests that four (4) PCs would be appropriate in order for the team to efficiently and effectively manage the complexity and volume of work that the division is responsible for supporting (refer to Table 1 below). The PCs are responsible for the end to end procurement process i.e. from initial Client engagement to posting of bids, compliance, award process, issuance of POs, facilitating debriefs and conducting lessons learned.

Notes: Seating for the new position is included as part of the cubicle reconfiguration for Financial Services.

Department: Financial Services Division: Accounting & Revenues

Request: Accounting Analyst

Description/Impact:

This new role is proposed to enable the Department to improve overall timeliness and accuracy of monthly reporting to and by client departments, and for reporting to ELT and Council on a regular and timely manner. This position will oversee and conduct analysis on monthly entries, revenue accruals, major expense accruals, deferred revenue calculations, prepaid expenses, internal charges, transfers to and from reserves and other entries necessary for timely and accurate financial information each month and each forecast. This position will also assume responsibilities transferred to the Department in respect of development charges inquiries, setting of charges to be collected for non-residential and mixed use applications, periodic indexing of rates, managing the monthly accounting, reporting and remittance of development charges, and coordinating the preparation of the annual development charges statutory statement for Council, and the overall general administration of Development Charges for the Town. This position will lend assistance in the preparation and implementation of the anticipated new Financial Information System. Without this position, the Department is unable to effectively accommodate the work with respect to monthly accrual and reporting work, development charge inquiries and application charge setting, and will be unable to increase other supports to client departments.

Notes:

This position supports the corporate administrative priority of improving financial accuracy and accountability across the organization, and is required to meet the demands imposed by client departments. Position is proposed to be funded 40% from building permit fees (in respect of the development charges work) and 10% funded from utility user rates. Estimate Grade 9.

Department: Community Services Division: Facilities Request: Program Manager, Facility Capital Projects

Description/Impact: Aurora, like many municipalities, is facing the reality of aging infrastructure. There needs to be a well-planned, managed and funded approach to facility capital project delivery. Based on Aurora's Asset Management Plan and Building Condition Assessment, the Facility Division is responsible for the following facility capital projects:

- 2018 31 new projects (24 will be complete by year end, 7 roll over to 2019)
- 2019 49 new projects
- 2020 42 new projects
- 2021 25 new projects

Currently, the Town's Facility Supervisor's oversee facility capital projects in addition to their core job functions of supervising staff and ensuring the facilities are operational day to day. The two facility supervisor's oversee eight buildings including Town Hall, Seniors Centre, Cultural Centre, Library, SARC, AFLC, ACC, JOC. As of 2019, the Armoury will be added to the list. The current workload and high volume of facility capital projects results in projects not being completed within the approved funding year (rolling over to another year) and adversely affecting service delivery.

Over the past few years due to aging infrastructure, there has been an increase in the number and complexity of facility capital projects but no additional staff dedicated to complete them.

Alternatively, facility capital projects could be deferred and spread out over subsequent years; however, delaying the inevitable will only cost the Town in the future due to rising costs of construction. Adding a dedicated Program Manager, Facility Capital Projects streamlines the responsibilities with an individual who can focus on capital project delivery thereby enabling the supervisor's to manage the facility operations.

Department: Operational Services Division: Parks and Fleet

Request: Fleet Supervisor

Description/Impact:

Fleet moved to Operational Services in December 2017 and came under management of the Parks Division. The primary supervision of the mechanical staff has fallen under the jurisdiction of the Parks Supervisor. These additional duties have been a significant drain on Parks staff resources, specifically the Parks Supervisor as it is a fulltime position in its self and he is spending 4 + hrs a day managing Fleet in an efficient manner. This is being accomplished by the supervisor working an additional 2 hrs a day of overtime. In addition the Parks Administrative staff and Parks Manager spend numerous hours a week dealing with capital project/procurement/accounts payable. Staffing has been an on going issue within Fleet for many years, it has always been additional responsibility to a staff members job function and has not had someone dedicated to its management. There have been inherent retention issues, challenges getting qualified recruits for job postings and insufficient expertise in management and mechanics in certain areas, all which has lead to interruptions in the flow of work and productivity. While many changes have been implemented over the last year and the Fleet is running more efficiently, more opportunity exists with the addition of a dedicated support the area demands. A fulltime Fleet Supervisor will benefit the Corporation by:

• Possessing the necessary fleet knowledge or hands on experience to know the fundamentals of the business, assisting the mechanics in the proper scheduling of the work and improve on productivity • Recruiting a dedicated full time fleet supervisor will support the fleet operation staff and manage the scheduling and day to day operational needs. Having it as part of another fulltime position is insufficient and at the expense of the Parks division• Manage work orders/assets/financials • Fleet supervisor will be stationed in the mechanics bay and serve as hands on support and will determine what work should be completed in house or external • Minimize life cycle vehicle and equipment costs• Ensuring fiscal performance• Improving customer satisfaction of the divisions it serves• Move the fleet forward into the future, greening initiatives and being proactive vs reactive to planning and maintenance needs • Optimizing scheduled fleet replacement.

In addition the position will help continue the initiatives started in 2018 by Fleet management staff and explore new ideas. Inclusive of the review of the fleet assets and replacement schedule analyzing the impacts on the 10 year capital and fleet reserve forecast. They will also explore opportunities for shared equipment with other municipalities and for innovative ways to manage and maintain the fleet.

Fleet is a multi-million dollar asset to the Town and integral in allowing us to provide staff with the equipment and resources necessary for them to provide the services required, within the Town. As such, it is integral that it receives the much need attention it has not received for many years. We are in a perfect position to get the division in line financially and administratively, functions a fulltime Fleet Supervisor will provide.

| Department: Operational Services | Divisio | n: Parks & Roads Operations |
| Request: 2 Flex Service Operators | Jarka and | Roads Operations Divisions have employed a contingent of |
| seasonal workers serving in the Parks Ope November through April each year. These parks and the challenges we continue to face qualified and trained staff. This is becoming occasions where it became necessary to in order to find a qualified candidate. This has front line operations staff on a consistently number of seasonal staff in both Parks and the Roads and Parks operations. The oper most notably by having the fully qualified ar to achieve further benefits by converting the eliminate the following; the qualified staff retransitions re: CUPE issue; the repetitive, I positions; the continual need to retrain oper more reliable work force, more efficient wor force, greater employee equity demonstrate knowledgeable staff results in less time specified. | rations from the consistency of | om May through October and in the Roads Operation from and duties are equivalent to our fulltime CUPE staff operators. hese positions is the availability and retention of suitably antly more difficult in that we have experienced several eated recruitment postings for a single seasonal position in impact on our ability to provide highly qualified and professional asis. In more recent years, it has been possible to cross train a operations and as a result the same staff has moved between a significantly benefited from this flexibility on a number of fronts, it staff available to both sides of the operation. Staff are seeking onal positions to full time compliment. By doing so, it will saue; the mandatory 4 week layoff between seasonal division and costly recruitment process for both roads and parks seasonal both sides of the operation. Benefits of this conversion include; a more skilled work force, a more engaged and dedicated work employer, cost savings associated with highly skilled and |
